

MOBILEARNASIA 2013

The Centre for e-Learning (CeL) participated in **MobiLearnAsia 2013** on 2-3 October, at the Suntec Singapore Convention Centre. This was the second year CeL was invited to exhibit at this conference.

Delegates from around the world were introduced to CeL's Android and iOS apps: NIE mVideo, NIE Well Said, and NIE mGeo, as well as the web app, Dollar Dash. CeL staff explained that the apps were designed to help educators rethink their traditional method of teaching. Visitors found our apps relevant in today's education and useful for their own teaching.

Dr. Ashley Tan, Head/CeL, presented 'Jailbreaking Education with Mobile Learning' during one of the concurrent sessions. The response to his topic was overwhelming and participants were drawn to our exhibition booth for hands-on demonstrations.

If you would like to find out more about these applications, do send us an email via celapps@nie.edu.sg. Stay tuned for upcoming issues on other useful applications that you might use in your teaching.
